Laravel Web Developer

ABOUTE ME

I am a passionate and results-driven Laravel web developer with a strong foundation in backend and frontend development. My expertise lies in creating efficient, scalable applications with an eye for clean design and secure architecture. Having worked on diverse projects, from ERP systems to payment gateways, I am adept at integrating third-party services and optimizing web performance.Outside of development, I enjoy exploring new technologies, experimenting with UI/UX design, and contributing to open-source projects. My goal is to create meaningful, impactful software that enhances user experiences and drives business success.

SKILLS

- **Backend Development**: PHP, Laravel, MySQL
- **Frontend Development**: HTML, CSS, Bootstrap, JavaScript, jQuery
- **Version Control**: Git, GitHub
- **Third-Party Integrations**: MailChimp, Google Analytics, Payment Gateway Integrations
- **Security Enhancements**: Laravel authentication & authorization
- **Database Optimization**: Optimized complex queries to improve performance
- **Cross-Browser Compatibility**: Ensured seamless user experience across multiple platforms
- **Basic Knowledge**: Python
- **Client Project Management**: Collaborated directly with clients to gather requirements, provide project updates, and ensure timely delivery of tailored solution

---

PROFESSIONAL EXPERIENCE

9dot technology inc.   **January 2024 - Present**

Laravel web developer

In my current role at 9dottechnology, I am responsible for leading the development of high-impact web applications using Laravel. I manage both backend architecture and client communications, ensuring that projects are delivered efficiently and align with client expectations. My work includes overseeing the full project lifecycle, from requirement gathering and system design to implementation, testing, and deployment.

Accomplishments:

- **Client Project Handling**: Managed client communications, gathered detailed requirements, provided updates, and delivered projects tailored to their needs. Ensured timely project delivery and post-deployment support.

- **Zaropay Payment Gateway**: Developed a payment gateway similar to Razorpay, managing both backend (Laravel & Node.js) and frontend design.

- **Jobly Canada**: Created a job board application with complex user access controls and data management.

Workdo solutions private limited   **April 2022 - December 2023**

junior web developer

During my time at Workdo Private Limited, I started with a 6-month internship, which allowed me to gain hands-on experience in web development using Laravel. After completing the internship, I transitioned into a full-time Laravel developer role, contributing to the development of various internal and client projects.

Accomplishments:

- **ERP System**: Led the development of a modular ERP system with 102 add-ons, integrating third-party services.

- **Broadcast Project (Linkaty)**: Developed a smart page and smart link system, integrating MailChimp, pixel tracking, and Google Analytics.

- **HRM System**: Managed the creation of a multi-tenant HRM system to handle employee records, leaves, and payroll.

- **Dash**: Worked extensively on Dash, a modular-based system that combined multiple business solutions into one platform, including ERP, CRM, CMMS, ROTAgo, a payment gateway, a booking system, and Vcard Go. This product allowed businesses to manage their operations efficiently by integrating various tools into a single interface.

EDUCATION

- **Bachelor in Computer Applications (BCA)**

  CGPA: 7.8/10, First Distinction Graduation: March 2019

- **HSC –** Percentage: 81%, March 2017
